

Combi-Light with gooseneck arm

Colour of the lamp: white

L100006A

Data sheet

Lamps of Provita medical give always a good light on that what is important: the health and the well-being of the patient. Our series 1 halogen and LED lamps are preferable used as examination lamps whereas our Series 2 lamps are normally used as a reading lamp at the patient's bed or also applied as a small doctor's lamp. The low temperature development of our energy saving Series 3 and Series 4 lamps enables an ideal reading lamp in the care areas. Many rooms, multiple walls, one solution: wall systems from Provita. A discreet, space-saving and effective support in the medical daily work. Numerous and possible variations with a very extensive accessory selection offering an answer for every need and application.
