Data sheet

Lamps of Provita medical give always a good light on that what is important: the health and the well-being of the patient. Our series 1 halogen and LED lamps are preferable used as examination lamps whereas our Series 2 lamps are normally used as a reading lamp at the patient's bed or also applied as a small doctor's lamp. The low temperature development of our energy saving Series 3 and Series 4 lamps enables an ideal reading lamp in the care areas. Provita IV-Rods and Stands are employed in numerous of doctor practices as well as the intensive and normal care. In order to satisfy all demands in a hospital as well as daily normal care, Provita offers for every application area, an individual and perfect drip stand solution. Hereby also contributing with an essential and extensive accessory program.
