Data sheet

Lamps of Provita medical give always a good light on that what is important: the health and the well-being of the patient. Our series 1 halogen and LED lamps are preferable used as examination lamps whereas our Series 2 lamps are normally used as a reading lamp at the patient's bed or also applied as a small doctor's lamp. The low temperature development of our energy saving Series 3 and Series 4 lamps enables an ideal reading lamp in the care areas. Provita IV-Rods and Stands are employed in numerous of doctor practices, operation rooms as well as the intensive and normal care. In order to satisfy all demands in a hospital as well as daily normal care, Provita offers for every application area, an individual and perfect drip stand solution. Hereby also contributing with an essential and extensive accessory program. Many rooms, multiple walls, one solution: wall systems from Provita. A discreet, space-saving and effective support in the medical daily work. Numerous and possible variations with a very extensive accessory selection offering an answer for every need and application.
