

Quality in every aspect

Innovation means to us challenges that we gladly face. And therefore, provita has been standing out now for more than 50 years for medical-technical products as „Made in Germany“. Our outstanding reputation is not only due to the quality of our products but also and just as much to our contact with customers and business partners.

We see ourselves as a partner of industry and trade in the health service. We are competent and approachable, and that in the truest sense of the word: hand to hand with German and English, as well as Spanish, Russian, Polish and French which are fluently spoken in our office.

For provita the personal, confident and friendly contact with the customers is not a theoretical overall concept but instead an everyday life-model.
