Counter spindle operation
Powered tools

You are looking for an experienced partner for the development of new products?

We have built up many years of expertise in the field of product development of accessories for your carts as well as a large selection of existing products.

Always the right accessories

Keyboard tray

Bottle holder

Lamps

Wall bracket

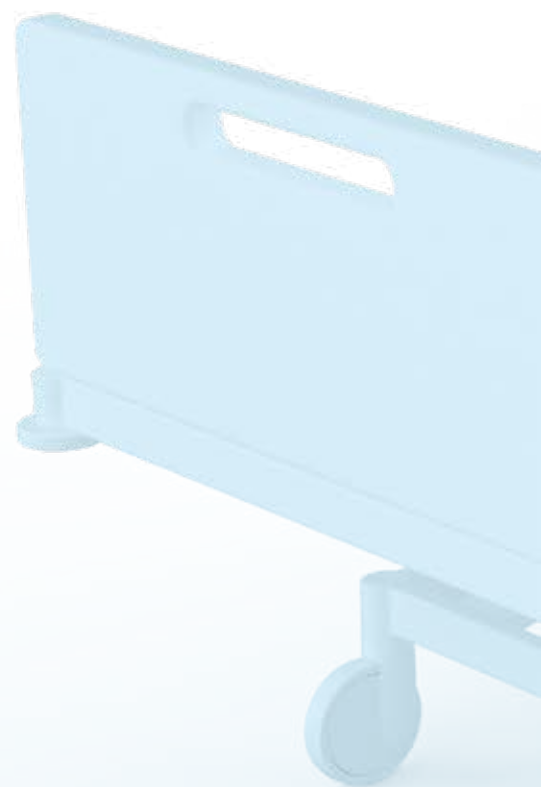

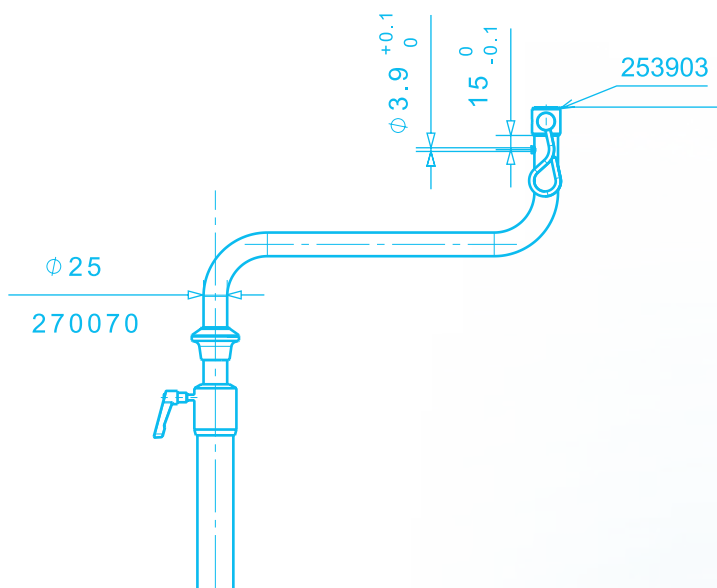

Equipment rail

Storage basket

We already offer many products all around the patient bed. We are also looking forward to your project task.

The bed is the key point of patient care. This increases the importance of ensuring that accessories fit seamlessly into the medical processes.

Always the right accessories

Bended IV-Pole

Reading lamp

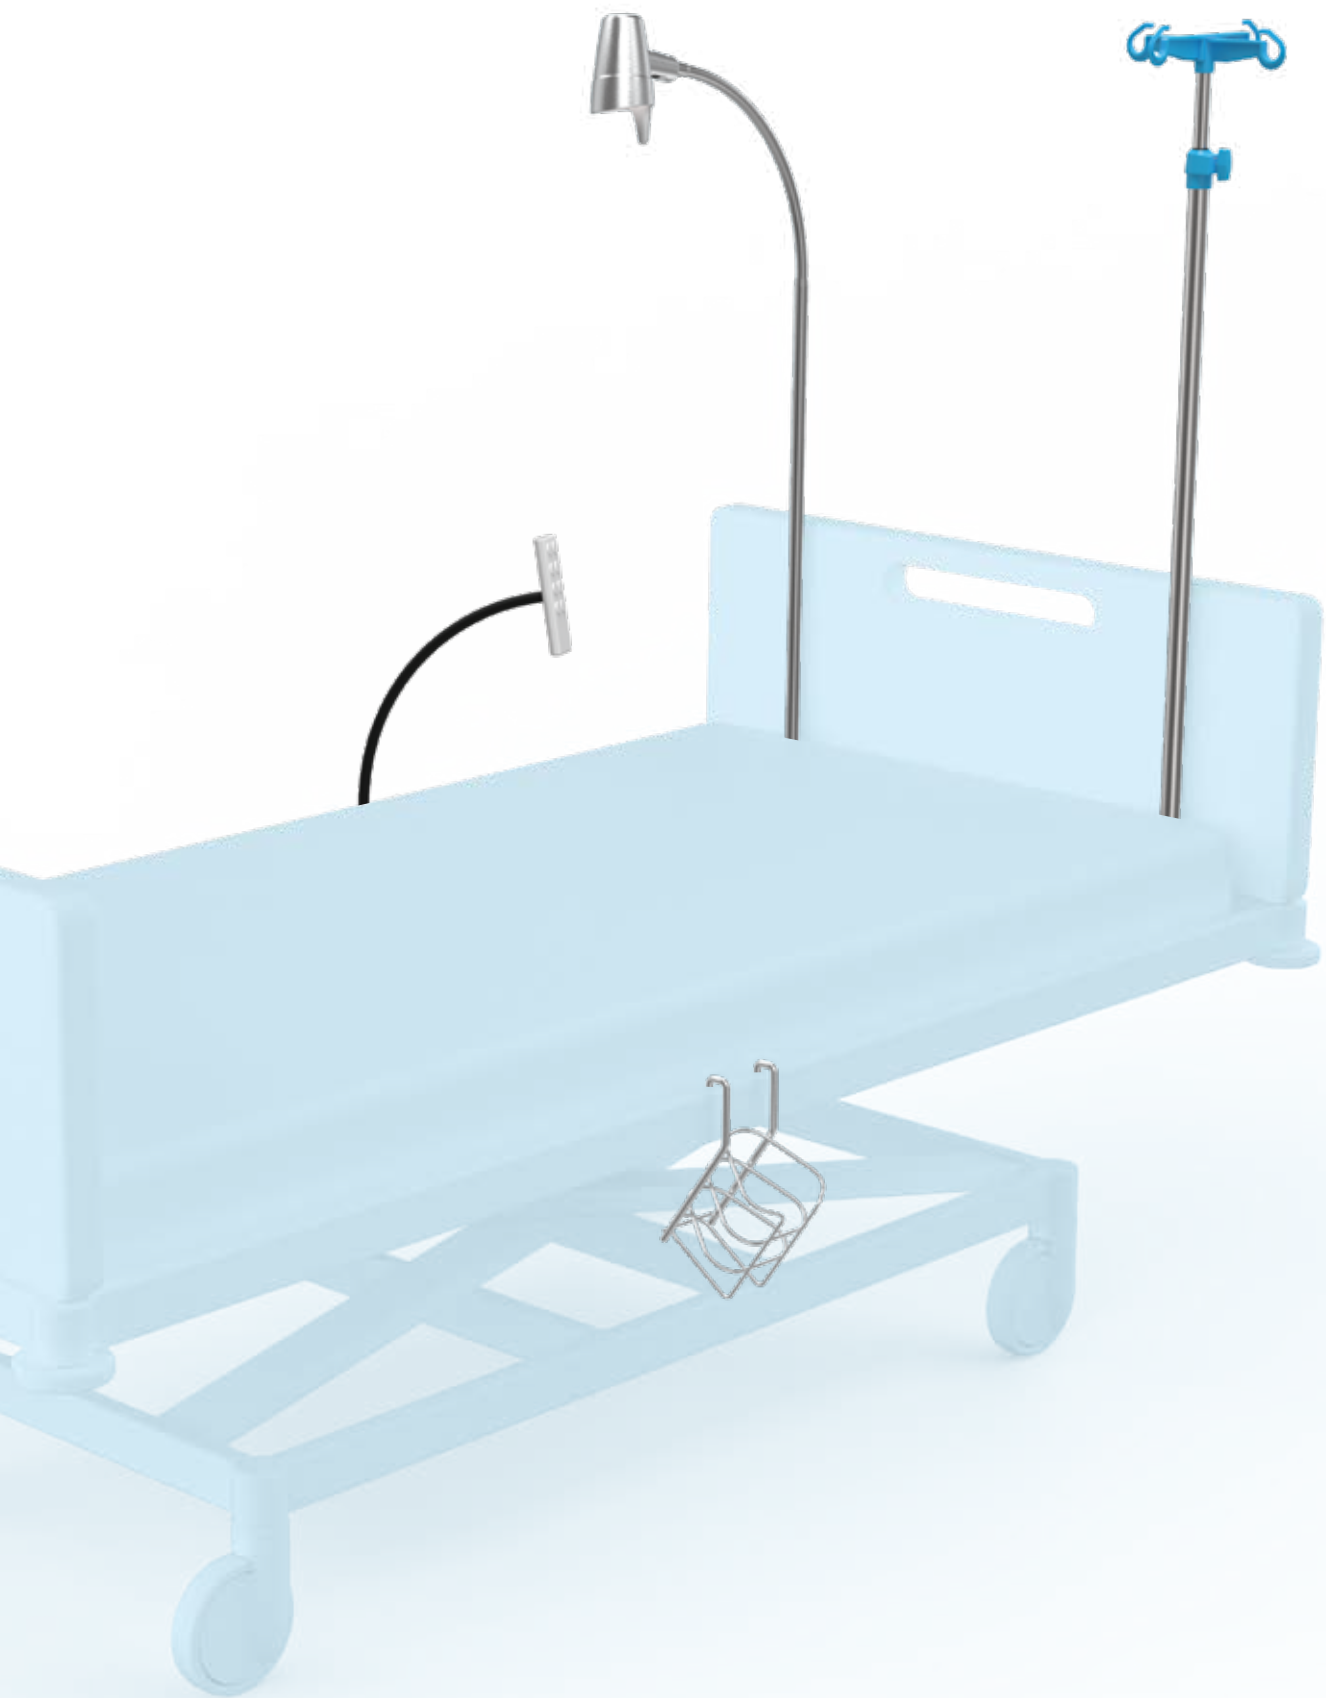

Urine & Bottle basket

Drainage holder

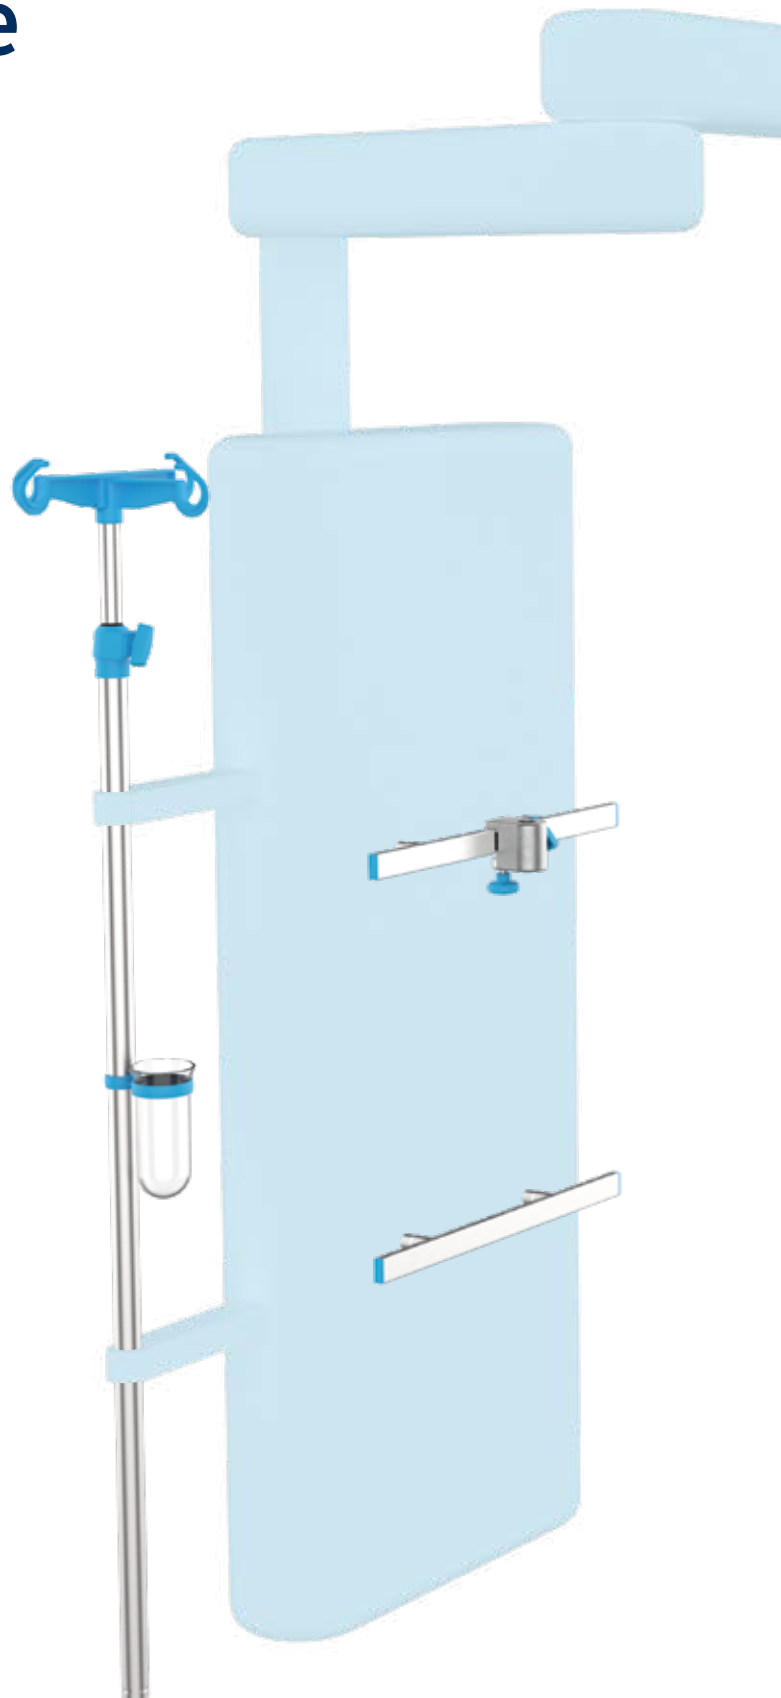

Control holder with gooseneck arm

Different rooms require flexible solutions.

We are the OEM partner who provides you with the necessary freedom of movement. We will be glad to help you develop a customized solution if our standard products do not fully meet your requirements.

Versatile options for every application field

Wall rail clamp

Adjustable wall rail clamp

Wall rail cart

ICU holder for equipment rail and round tube

Bottle bar

The right accessories for your lamps.

Whether from the ceiling, from the wall or from the stand on castors – with our accessories you illuminate every angle properly.

+ multi-coloured possibilities

In a mutual dialogue, your requirements are transformed into a concrete drawing, a prototype and a series product that meets current standards.

Good teamwork is only possible through motivated employees.

Working with us is like having direct contact with all production departments at once.

» Quality as a self-evident fact. This applies to our products and also to the behaviour among each other. «

Dario Salpetro,
with provita since 08/2010

»

Sure... it has to be steadfast. That is why we subject our infusion stands to 9 different tests and document them accordingly, resulting in a standard-compliant product that you would sell gladly and which meet the requirements of the hospital.

«

Jonathan Gonzalez,
with provita since 05/2006

Our primary objective is to develop user-friendly products through an intensive communication with nursing staff, doctors, specialist dealers,

architects and industrial customers. Personal and solid advice is our top priority. This results in tailor-made, innovative products.

We are prepared for the future and will always work toward it.

**» Details are crucial for our products.
The mixture of automated and hand-
crafted production is demanding
and exciting. «**

Waldemar Worster,
with provita since 06/2004

» Finally, we pack each product individually.
The fact that we only use recycled cardboard is the right ecological approach. «

Olga Geinez,
with provita since 04/2015

The provita building stones for sustainable, ecological and modern production:

PHOTOVOLTAIC
approx. 230 megawatt
hours per year

POWER STORAGE
approx. 140 kilowatt hours

RECYCLABILITY
we achieve 60 % with
our products

**EU CHEMICALS DIRECTIVE
REACH**

**RESTRICTION OF CERTAIN
HAZARDOUS SUBSTANCES IN
ELECTRICAL AND ELECTRONIC
EQUIPMENT
RoHS**

CARDBOARD BOXES
we only use
recycled cardboard

LIGHTING
Workplace LEDs are controlled
through motion detectors

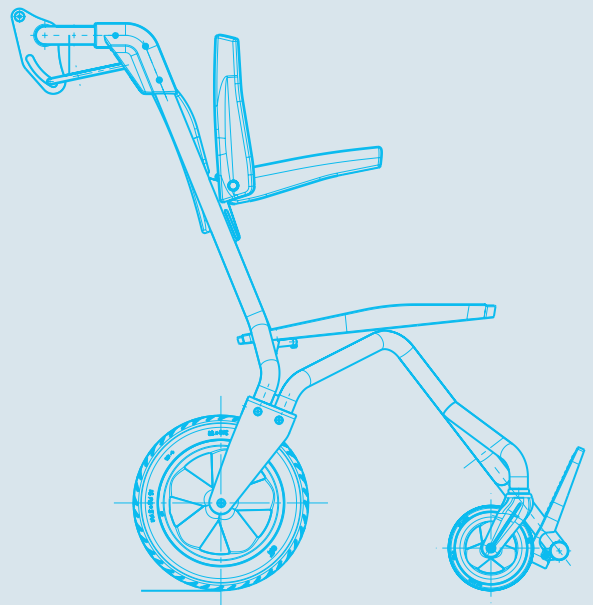

ENERGY
saving energy
thanks to our
modern machinery

HEATING
isolated like a private home.
We heat with a modern,
low-emission gas central
heating system

» My work remains varied
and challenging thanks to
further developments and
innovations. «

Johann Mientus,
with provita since 11/2006

Even new products are not strange to us.

SAM
sit and move

Many of our products have been created through an intensive cooperation with our customers.

We would be glad to support you with new ideas and thoughts.

»
**provita medical
gmbh & co. kg is
an established,
family-owned,
medium-size company
and one of the leading
manufacturers in
medical technology.**
«

Provita medical has a tradition of more than 50 years. The range of our products is the result of good cooperation with our customers and users, meeting the high demands of the market. As an OEM partner, we are also available to our customers.

We develop and produce at a centrally located site in Wermelskirchen, North Rhine-Westphalia. Sales and delivery to our international business partners also takes place from there. As a manufacturer of medical technology products, provita medical gmbh & co. kg aims to run all production and business processes in a responsible and sustainable manner.

We produce and process raw materials and materials from reliable European suppliers.

These partnerships with renowned manufacturers and the quality seal " Made in Germany " guarantee the highest quality. At the company's own production facility in Wermelskirchen, provita medical combines the use of modern machines with meticulous manual work. The company is equipped with powerful CNC-controlled turning, milling, plastic injection moulding and tube laser machines and a packaging and bending machine, ensuring exact and on-schedule production of the products. Cleanliness and a well thought-out storage system are also an expression of our understanding of careful work. High technical standards and timeless product design perfectly complement each other. We have a team of technical staff dedicated to

deal intensively with the wishes and requests of our customers. Every product is checked for perfect condition before packaging and carefully packed for safe transportation. Our quality management ensures that all steps – from production to documented shipment – are conscientiously followed through. Production is carried out in accordance with ISO 9001 standards. Provita medical guarantees repeat orders (also of individual parts) for a period of 10 years and therefore guarantees the long-term use of all products.

Provita medical is not only committed to the needs of its customers but also assumes social responsibility. This begins with a considered use of resources and extends to the support of social, humanitarian projects in the local, regional and international environment of our company. For ecological reasons, we heat our company building with highly efficient heating systems and use energy-saving lighting systems with high-power LEDs to illuminate the production halls. Modern waste heat management and cooling systems for our machines minimize our energy consumption. Besides complying with legal waste separation, the recycling of recyclable materials is carried out by certified service providers.

At provita medical, holistic environmental protection and product sustainability have top priority.

From development to recycling of the respective product, we think environmental-friendly and try to use only environmental-friendly substances as much as possible. We also demonstrate this by complying to the RoHS guidelines and the REACH regulations at the places where this is desired.

The use of our financial resources within a justifiable and risk-minimised investment framework provides us with financial independence. The growth of our company is controlled to a healthy extent.

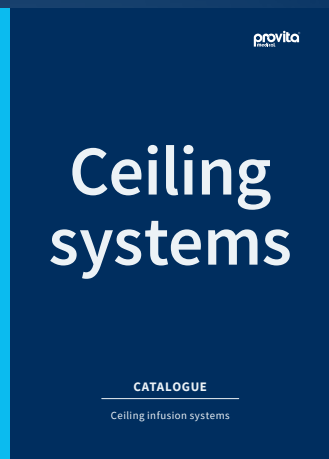

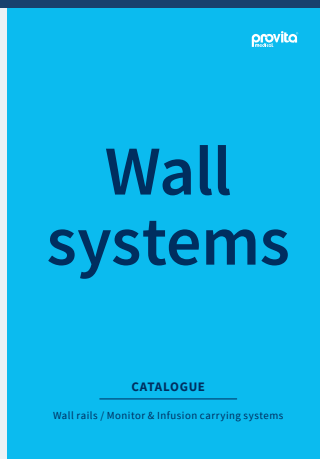

We see it as our duty to think and act long-term: for the benefit of our customers as well as for a better future for the company, society and the next generation.
