Mobile guest chair

In a society that is becoming older, more agile and more mobile – put down a marker. Hotel and restaurant visits are at the start and end of long days full of activities with family and friends. Whether a city tour, a visit to a museum, a shopping trip or hiking: when we are tired, we appreciate a good level of comfort to start or end the day in a relaxed way. Enable your guests to enjoy a relaxed stay at your premises, a carefree evening walk or a tour in town. SAM allows your guests to actively participate and join in! In comparison to classic wheelchair rental, our mobile chairs are a popular choice where this chair does not give the user the impression of being ill and restricted – mobility support is part of everyday life. The modern, understated design of SAM

allows anyone with limited mobility to enjoy a relaxed and unrestricted stay, for example through:

- an integrated safety braking system that is gentle on the hands,
- the use of high quality materials,
- a space saving design, folding armrests and footrest,
- durable, low noise and fail-safe tyres.

The well-thought-out accessories (seat belt, parking station, etc.) and the options for individual advertising of this service make SAM a comprehensive and carefree package for everyone.

+ SAFE AND COMFORTABLE

+ SPACE SAVING AND STACKABLE

+ 150 KG STURDY LOAD CAPACITY
