Mobile shopping chair

Going shopping together with family or friends is great fun. Browsing, considering, comparing, buying and last but not least: joining in! But leisurely browsing is also very strenuous, as miles soon accumulate, especially at a shopping centre plus all the standing involved. And at the end of the day, our legs feel heavy and tired. In a society that is becoming increasingly older and more mobile, you can add another benefit to your range of services. Allow your customers to participate in a mutual shopping experience. In comparison to classic wheelchair rental, our mobile chairs are a popular choice where this chair does not give the user the impression of being ill and restricted – mobility support is part of everyday life. The modern, understated design of SAM

allows anyone with limited mobility to enjoy a relaxed and unrestricted stay, for example through:

- an integrated safety braking system that is gentle on the hands,
- the use of high quality materials,
- a space saving design, folding armrests and footrest,
- durable, low noise and fail-safe tyres.

The well-thought-out accessories (seat belt, parking station, etc.) and the options for individual advertising of this service make SAM a comprehensive and carefree package for everyone.

+ SAFE AND COMFORTABLE

+ SPACE SAVING AND STACKABLE

+ 150 KG STURDY LOAD CAPACITY

+ PERSONALISED ADVERTISING
